

ABSTRACT OF THE DISCLOSURE

Disclosed is a release sheet with a printed layer for use with a pressure sensitive adhesive label for indicating information. The release sheet comprises a release sheet base, a releasing agent layer provided on one of the surfaces of the release sheet base, and a printed layer provided on the releasing agent layer. The printed layer has fixed and/or variable information and is formed by means of thermal transfer printing. Further, a pressure sensitive adhesive label for indicating information is also disclosed. The pressure sensitive adhesive label is adapted to be stuck onto the release sheet with the printed layer mentioned above before the pressure sensitive adhesive label is used.
